

Lot 61 Reduced Levels and Sections at Side Boundaries

Using the given information do the following

1. Book staff reading (rise & fall method) onto the rise & fall template
(Do the arithmetical check to confirm the correct booking in rise & fall column)
2. Use the assumed reduced level (RL) at 'A' to calculate reduced level for each station in alphabetical order.
3. Draw section views (ground profile) of the site boundaries using a horizontal scale of 1:200 and a vertical scale of 1:50 (Select a baseline for the vertical section of 6 metre)

Rise & Fall Template
